Index to Volume XLVI

By Titles

Abacus, The, by Elaine Cravitz — History and Use — Nov. p.67

Advanced Orbiting Astronomical Observatory, Staff — Condensation of MIT report — Dec. p.14

Analog Computers, by Allan Green, '66 — Explanatory Treatise — Nov. p.62

Arithmetic Statement Compilers, by Leo Rotenberg, '65 — Nov. p.48

An Associative Theory of Short- and Long-Term Memory, by Prof. Wayne A. Wickelgren — Jan. p.40

Commucar, News Brief — Oct. p.63

Communications Satellites, by Mike Shupp, '68 — Feb. p.15

Computer Art, by Sanford Libman, '65 — Pictorial — Nov. p.20

Computers and Behavioral Science, by Prof. Joseph Weizenbaum — Psychological logic — Jan. p.14

Computers in Medicine, by Eric Westerfeld, '65 — Diagnosis Programs — Dec. p.27

Computers on Campus, Staff — Nov. p.15

Computing Machines as Research Assistants, by Prof. Philip Morse — Processing Research Data — Nov. p.39

Dictionary of Computer Terms, A, Staff — Nov. p.13

Enzymes and Their Application, by Prof. Irwin W. Sizer — Structure and Uses — Jan. p.20

Experiments in Perception, by Dr. Jerome Lettvin, '47 — Visual Research — Nov. p.30

Featuring: The Department of Psychology, Pictorial — Jan. p.33

Featuring: Prof. Edgerton, Pictorial — Oct. p.26

Future of Urban Transportation, The, by Jason Fane, '64 — Feb. p.34

GASP, by Joseph Hanlon, '63 — Institute Scheduling Program — Nov. p.25

Genetics and Probability, by by Gerald Clarke, '66 — Mathematical Treatment — Jan. p.54

Gold-Moffat Theory, News Brief — Oct. p.60

Heuristic Approach to Air Fare Calculation, A, by Richard P. Gruen, '65 — Feb. p.42

Highway Location Analysis, Staff — Computer Use in Civil Engineering — Feb. p.24

Implications of Mechanical Translation Research, by Dr. Victor Yngve — Computer Translating Programs — Dec. p.36

Land Experiments, The, by Alan Perelson, '67 — Discussion of Land's Experiments in Color Theory — Oct. p.21

Lasers, by David Vanderwerf, '66 — Introductory Description — Oct. p.14

Light Sensitive Glass, by Philip Gustafson — Description of New Corning Glass — Oct. p.46

Marketing Urban Mass Transit, by Jason Fane, '64 — Book Review — Feb. p.51

Mathematical Analysis of Colored Crystals, by Ellen Bronstein, '67 — Investigation of Color in Inorganic Salts — Oct. p.37

MHD Generator, by Wayne B'Rells,'64 — Mathematical Discussion of Possible Power Source — Oct. p.50

MIT Satellite, News Brief — Oct. p.60

NASA Electronics Research Center, by Allan Green, '66 — Discussion of Kendall Square Project — Dec. p.30

Neural Information Processing and Memory, by Prof. Stephen Chorover and Prof. Peter H. Schiller — Experimental Report — Jan. p.45

Object Time Storage Allocation of List-Processing Systems, by Richard P. Gruen, '65 — Nov. p.53

Pattern Recognition, by Frank DerSarkisian, '64 — Identification Programs — Nov. p.58

Project MAC, by Oliver Selfridge, '45 — Research on Computer Utility — Nov. p.17

Townes Wins Nobel Prize, News Brief — Nov. p.65

Water Vapor on Cool Red Giants Measured by Stratoscope II, News Brief — Oct. p.59

Women in Science and Engineering, Staff — Summary of Events at MIT Symposium — Dec. p.44

By Authors

Wayne B'Rells, '64 *MHD Generator* Oct. p.50
Mathematical Discussion of Possible Power Source

Ellen Bronstein, '67 *Mathematical Analysis of Colored Crystals* Oct. p.37
Investigation of Color in Inorganic Salts

Prof. Stephen Chorover and Prof. Peter H. Schiller *Neural Information Processing and Memory* Jan. p.45
Experimental Report

Gerald L. Clarke, '66 *Genetics and Probability* Jan. p.54
Mathematical Treatment

Elaine Cravitz *The Abacus* Nov. p.67
History and Use

Frank DerSarkisian, '64 *Pattern Recognition* Nov. p.58
Identification Programs

Jason Fane, '64 *The Future of Urban Transportation* Feb. p.34

— *Marketing Urban Mass Transit* Feb. p.51
Book Review

Allan Green, '66 *Analog Computers* Nov. p.62
Explanatory Treatise

— *NASA Electronics Research Center* Dec. p.30
Discussion of Kendall Square Project

Richard P. Gruen, '65 *A Heuristic Approach to Air Fare Calculation* Feb. p.42

— *Object Time Storage Allocation for List-Processing Systems* Nov. p.53

Philip Gustafson *Light Sensitive Glass* Oct. p.46
Description of New Corning Glass

Joseph Hanlon, '63 *GASP* Nov. p.25
Institute Scheduling Program

Dr. Jerome Lettvin, '47 *Experiments in Perception* Nov. p.30
Visual Research

Sanford Libman, '65 *Computer Art* Nov. p.20
Pictoral

Prof. Philip Morse *Computing Machines as Research Assistants* Nov. p.39
Processing Research Data

Alan Perelson, '67 *The Land Experiments* Oct. p.21
Discussion of Land's Experiments in Color Theory

Leo Rotenberg, '65 *Arithmetic Statement Compilers* Nov. p.48

Prof. Peter H. Schiller and Prof. Stephen Chorover *Neural Information Processing and Memory* Jan. p.45
Experimental Report

Oliver Selfridge, '45 *Project MAC* Nov. p.17
Research on Computer Utility

Mike Shupp, '68 *Communications Satellites* Feb. p.13

Prof. Irwin W. Sizer *Enzymes and Their Application* Jan. p.20
Structure and Uses

David Vanderwerf, '66 *Lasers* Oct. p.14
Introductory Description

Prof. Joseph Weizenbaum *Computers and Behavioral Science* Jan. p.14
Psychological Logic

Eric Westerfeld, '65 *Computers in Medicine* Dec. p.27
Diagnosis Programs

Prof. Wayne A. Wickelgren *An Associative Theory of Short- and Long-Term Memory* Jan. p.40

Dr. Victor Yngve *Implications of Mechanical Translation Research* Dec. p.36
Computer Translating Programs

Staff *Advanced Orbiting Astronomical Observatory* Dec. p.14
Condensation of MIT Report

— *Computers on Campus* Nov. p.15

— *A Dictionary of Computer Terms* Nov. p.13

— *Highway Location Analysis* Feb. p.24
Computer Use in Civil Engineering

— *Women in Science and Engineering* Dec. p.44
Summary of Events at MIT Symposium

News Briefs *Commucat* Oct. p.63

— *Gold-Moffat Theory* Oct. p.60

— *MIT Satellite* Oct. p.60

— *Townes Wins Nobel Prize* Nov. p.65

— *Water Vapor on Cool Red Giants Measured by Stratoscope II* Oct. p.59

Pictoral *Featuring: the Department of Psychology* Jan. p.33

— *Featuring: Prof. Harold E. Edgerton* Oct. p.26
